stone oasis collection

oasis circle border

16' diameter

instruction guide

Materials Included:

66 roman pavers 8x10
80 roman pavers 6x8
59 split face 4x8
2 bags polymeric sand
gloves
instruction guide
landscape design plan

*This kit contains extra pieces. You will have pieces left over once you have completed the install.

Tools and Materials Required:

base material: 3/4" down crushed lime stone or equivalent

coarse sand
shovel, rake and broom
trowel

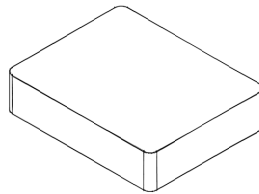

small plate compactor (rental)

Note: pick up compactor after excavation is done and base is levelled to minimize rental costs

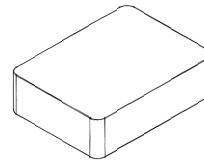

screed board and pipes
leaf blower (optional)

Note: if you are adding on to your existing oasis circular patio, then you will need to perform the necessary excavation before you can proceed.

8"x10"

6"x8"

4"x8" split face

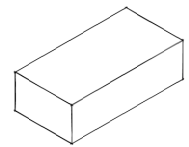

diagram A

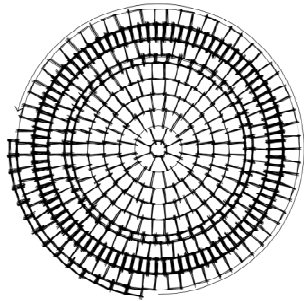

diagram B

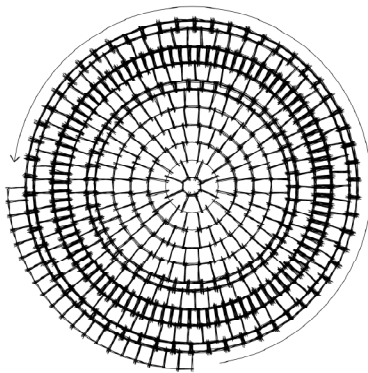

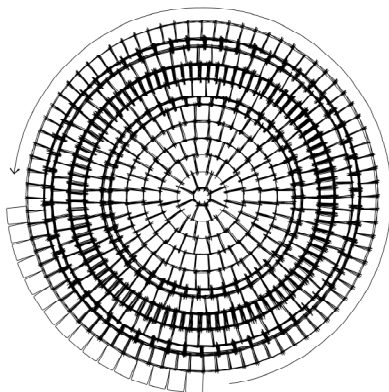

diagram C

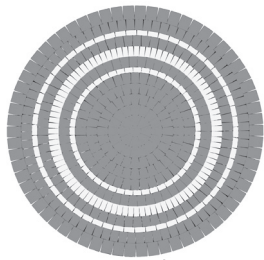

1. Lay out 4x8 split face pavers as illustrated in diagram A to form the first band of the circle border.

2. Lay out 6x8 roman pavers as illustrated in diagram B to form the second band of the circle border.

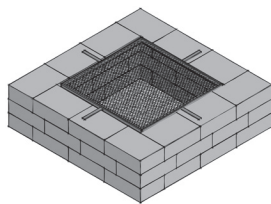

3. Lay out the 8x10 roman pavers as illustrated in diagram C to form the final band of the circle border.

4. Sweep polymeric sand into the joints between the pavers.
5. Use a leaf blower (if available) to aid in removing excess sand.
6. It is very important that excess sand is completely removed from the patio surface because once sand is wet, it will be very difficult to remove.
7. Once excess sand has been removed, then wet the patio as per the instructions on the polymeric sand packaging.
