

HIGH PERFORMANCE ENDLESS POOL®

The competition-level pool for the competitive athlete.

Launched at the IRONMAN™ World Championship in Kona, our High Performance current maxes out at a competitive :55/100-yard pace.

Utilizing the same dual-propeller system as our Performance model, the High Performance Endless Pool is augmented by a 7.5-hp motor and upgraded pump, both standard. The result is a swim current that's quieter and more powerful. Think of it as the strong silent type.

Like the ocean currents at Kona, the High Performance current is smooth, clear, robust, and warm. Unlike Kona, you can control the current's pace with the push of a button.

Every Endless Pool installs indoors or out, can be customized to suit any aesthetic, and has a fully adjustable current for beginning swimmers or light aerobic resistance. But the High Performance model adjusts higher, for a most vigorous challenge!

Perfect your stroke

High Performance Endless Pool®

The High Performance Endless Pool includes all of the standard features of an Original Endless Pool.

Our competition-level current also features:

- 7.5-hp, two-propeller swim current generator with wireless remote control
- 24" x 18" water outlet grill - almost 30% larger
- 220-volt, 50-amp GFCI power requirement

All of the same options are available as for the Original Endless Pool (see page 6).
